

E-Guidebook 2026: Navigating FDI in Vietnam

Exclusive Preview for TNC Vietnam's New Partners

Topic 1: Profit Repatriation – The "Accumulated Loss" Trap

Key Warning: Many FDI companies are legally blocked from sending money home despite being profitable.

- **The Critical Barrier:** Even with a high profit this year, "accumulated losses" from previous years can act as a total blocker. You must clear the historical "red ink" before a single dollar can leave.
- **The Compliance Hurdle:** Your bank will strictly demand specific audited reports and tax finalizations. Without these, your funds stay in Vietnam indefinitely.

The 3 Mandatory Hurdles, the 7-Day Notification Rule, and Practical Bank Document Templates.

Topic 2: Temporary Residence Card (TRC) – Beyond The Visa

Key Warning: Securing a long-term stay (up to 10 years) has strict, non-negotiable requirements.

- **The Validity Gap:** Your passport must be valid for at least 13 months to even start the process. The TRC duration is always tied to your passport's expiry date.
- **The Purpose Match:** You cannot apply for a TRC with a "wrong-purpose" visa. Your entry visa must strictly match your residence category (LĐ, ĐT, TT).
- **The Legalization Barrier:** Any document issued outside of Vietnam is legally "invisible" to the Immigration Department until it clears a specific legal process.

Duration Breakdown (2-10 years), the Essential Dossier Checklist, and exact Timeline & State Fees.
